Important Safety Information

The symbols for the warnings used in this manual are defined below:

Classifications

**Warning**

Warnings in this classification indicate risks that may result in serious injury or death if not observed.

**Caution**

Warnings in this classification indicate risks that may result in injury or damage to the surrounding objects if not observed.

**Notice**

Warnings in this classification indicate risks of damage to the product that may void the product warranty if not observed.

Description of Symbols

This symbol indicates a condition that requires caution (including warning). The subject of each caution is illustrated inside the triangle (e.g. the high temperature caution symbol is shown on the left).

This symbol indicates a prohibition. Do not take the prohibited action shown inside or near this symbol (e.g. the disassembly prohibition symbol is shown on the left).

This symbol indicates a mandatory action. A specific action is given near the symbol.

This symbol indicates a warning of possible laser radiation.

**Warning**

(Forbidden) Do not use the AC adaptor other than the provided one with the instrument. Using an inappropriate adaptor may damage the instrument. It may generate heat and cause fire.

(Do not remodel/disassemble) Never disassemble, modify, or repair. This instrument uses a Class 3B laser diode as the light source. Exposure to the laser may cause loss of eyesight and other injury. Never open the instrument other than the battery compartment.

(Handle properly) Handle the instrument properly in accordance with the
instructions provided in this manual.
Failure to do so may cause electric shock, fire, or sensor damage.

(Caution) If abnormal noise, smell, or smoke is observed, or if liquid has entered the instrument, turn off the power immediately, remove the batteries or pull out the plug.
Failure to observe the above may cause electric shock, fire hazard, or damage.
Please contact your local distributor or Kanomax service center for repair.

**Caution**

(Handle properly) Pull out the plug when the instrument is not in use.
Failure to do so may cause electric shock, fire hazard, and circuit damage.

**Notice**

(Forbidden) Do not use or keep the instrument in hot, humid, or dusty environment. Do not expose the instrument to direct sunlight for a prolonged period of time.
The instrument may not function properly out of the specified operational temperature range.

(Forbidden) Do not subject the instrument to strong impact.
Dropping or hitting the instrument may cause damage and malfunction.

(Forbidden) Do not wipe the instrument with volatile solvent.
The body may deform or deteriorate. Use soft dry cloth to remove stains. If stains persist, soak the cloth in neutral detergent and wipe the instrument with the cloth.

(Forbidden) Do not touch the LCD screen with a sharp-pointed object or with excessive pressure.
It may cause distortion of the screen or a malfunction.
A rapid temperature change may cause a malfunction of the screen.

(Handle properly) When storing the instrument, put the instrument in the carrying bag and keep it in a place with an ambient temperature of -10 to 50℃ and no condensation.
(Forbidden) Do not dispose of the instrument as household waste.
Please note that the disposal of the instrument and batteries should be in line with your local or national legislations. For details, please consult with your local distributor.

§ 2  Getting Started

Charging Batteries

- This instrument operates on the internal rechargeable battery or the provided AC adaptor. Connect the provided AC adaptor to start charging. It takes approximately 5 hours to charge the battery completely.
- If the battery’s run-time becomes shorter, the battery is replaceable. Open the compartment to replace the batteries with new 18650 Lithium-ion rechargeable batteries with protection circuit. (69mm length).

Caution

- Rapid temperature changes may cause measurement errors. When moving the instrument from one location to another with different ambient temperature allow a sufficient time for the instrument to return to room temperature. (more than ten minutes)

Checking the Temperature/Humidity Probe (Optional accessory for the MODEL 3889)

- Prolonged measurement under high temperature conditions or measurement under rapid temperature change may result in abnormally high humidity readings due to condensation. If condensation occurs, leave the probe in atmosphere of 40%RH or less for 24 hours to dry the probe.

Turning the Power ON/OFF

- Press and hold the Home button to turn the power on. A logo appears and then it turns to the startup screen. When the pump and other parts are ready to perform a measurement, the Main screen for ready to measure will be displayed.
- To turn the power OFF, press and hold the Home button (3 second or more) from any screens.

§ 3  Measurement Procedures

Turning the Power ON

- Press and hold the Home button to turn the power on. A logo appears and then it turns to the startup screen. Touch the startup screen to display the Main screen ready to measure.

Internal Cleaning

- Prior to use, purge the instrument (for internal cleaning) with the provided zero filter.
- Remove the Inlet protective cap, and attach the provided zero count filter to the inlet.
- Turn the power on and press the Start button. Perform a continuous measurement for 10 to 15 minutes until the measuring count value is suitable for 10 sec. or more.
- After measurement, remove the zero count filter from the inlet.
Measurement

- Use the General setup and Measurement setup sub-menus to configure the necessary settings.
- Set the measurement conditions from the Measurement mode. You can also select the measurement conditions from the Preset.
- Return to the Main screen. Press the Start button to perform a measurement.
- The measurement will complete automatically or by pressing the Stop button.
- The previous measurement results can be viewed from the History sub-menu.

Turning the Power OFF

- Press and hold the Home button from any screens to turn the power OFF.

Errors

- The following table explains possible errors due to self-diagnosis function. Even if an error occurs, the measurement and other processes will be continued.

<table>
<thead>
<tr>
<th>Laser power failure</th>
<th>Failure or end-of-life of the laser diode</th>
</tr>
</thead>
<tbody>
<tr>
<td>Flow rate</td>
<td>The pump current has increased or decreased. Remove the inlet cap and filter from the instrument. If the error persists, the possible cause is failure or the end-of-life of the pump.</td>
</tr>
<tr>
<td>Maximum measurable concentration exceeded</td>
<td>The concentration exceeds the maximum measurable range. Perform the measurement at a cleaner location or with the Zero count filter</td>
</tr>
</tbody>
</table>
§ 4 User Interface

Main Screen

- There are four configurations for the main screen that can be selected to best suit your purposes. (The figures below show the user interfaces of 6 channel Model 3889.) From each Main screen, you can move to sub-menu screens.

#### Icons, Names, and Functions

<table>
<thead>
<tr>
<th>Icons</th>
<th>Names</th>
<th>Functions</th>
</tr>
</thead>
</table>
| ![Unit Icon](image) | Unit | Select one of the following 3 options of units to reflect to the readings displayed on the Main screen and Measurement results.  
- count : Measured particle count  
- /m3: Particle count per cubic meter  
- /ft3: Particle count per cubic foot |
| ![Calendar Icon](image) | Calendar | Set the date and time  
- Touch the setup button to display the numeric keypad. Enter 2 digits in blanks for year, month, day, hour, and minute. |
<table>
<thead>
<tr>
<th>Icons</th>
<th>Names</th>
<th>Functions</th>
</tr>
</thead>
</table>
| ![Database Icon](image1) | Data    | Confirms the information and perform operation on the entire measured data  
- Memory remaining: Displays the ratio of the free space to the whole memory capacity.  
- Number of Records: Displays the number of the stored records.  
- Copy: Copies all files to the USB flash memory.  
- Delete: Deletes all files. It is therefore recommended to copy the files prior to use this function.  
Note that copying the measured data to the USB flash memory and deleting from the internal memory are not partial but batch processing. Follow the following procedure.  
| ![Database Icon](image2) | Step 1 | Select [Data] in the General setting  
| ![Database Icon](image3) | Step 2 | [Copy the measured data to the USB Flash Memory]  
- Insert the USB flash memory into the main body and tap the [Copy all] button.  
| ![Database Icon](image4) | Step 3 | [Delete the measured Data]  
- Tap the [Delete all] button.  
| ![Language Icon](image5) | Language | Selects a language  
- English, Japanese, Chinese, Spanish  
| ![Sound Icon](image6) | Sound   | Sets the operation sound ON/OFF  
| ![Information Icon](image7) | Information | Displays the instrument information  
- Latest calibration date: Depending on the usage and condition, it is normally recommended to calibrate at least once a year.  
- Version: To show firmware version of the instrument.  

**Note:**  
Tap [YES] to execute. Tap [NO] to return without running the command.
Measurement setting

- Select [Measurement Setup] in the Main screen to set the mode, alarm, save, remote, and temperature/humidity.

<table>
<thead>
<tr>
<th>Icons</th>

</table>

### Icons and Functions

<table>
<thead>
<tr>
<th>Icons</th>
<th>Names</th>
<th>Functions</th>
</tr>
</thead>
</table>
| ![Alarm](image) | Alarm               | Configures the alarm setting for the measured values in the Cumulative value. Tap indication ( ) for each particle size to configure the following settings.  
  - **Alarm**: To select the alarm function ON/OFF (Default setting: OFF)  
  - **Threshold**: To set the threshold value for the measured cumulative value for each particle size (Default: No setting)  
  The threshold value you set here will be the upper limit of the chart display. |
| ![Save](image)  | Save                | Toggles between saving or not saving the measurements                                                                                                                                                    |
| ![Remote](image) | Remote              | Use this setting to perform measurements according to commands from a remote computer  
  - **Setting**: sets the communication method for the "RS485", "Ethernet", "Wi-Fi" and each connection method’s parameters. ID is the identification number of the device.  
  - **Connection**: starts to connect outer PC                                                                                                         |
| ![Temperature/Humidity](image) | Temperature/Humidity | Sets measurement with the temperature/humidity probe ON/OFF and set the temperature unit (°C or °F) (Only for 6-channel model 3889) |
Preset

- Select [Preset] in the Main screen to set and select measurement conditions.

- Three options of Preset number provide 6 measurement modes each; therefore 18 measurement conditions in total can be preset.

- When setting the Preset, select one of the 18 measurement modes in the Step 3, then set the measurement conditions in the Step 4 as shown below:

<table>
<thead>
<tr>
<th>Step 1</th>
<th>Step 2</th>
<th>Step 3</th>
<th>Step 4</th>
</tr>
</thead>
<tbody>
<tr>
<td>Select [Preset] in the Main Screen.</td>
<td>Select one Preset number. No measurement conditions have been selected yet.</td>
<td>Select the Mode. Measurement conditions have been selected here.</td>
<td>Set or confirm the measurement conditions. Tap ✔ to select mode.</td>
</tr>
</tbody>
</table>

History

- Select [History] in the Main screen to confirm the previous measurement results.

<table>
<thead>
<tr>
<th>Step 1</th>
<th>Step 2</th>
<th>Step 3</th>
</tr>
</thead>
<tbody>
<tr>
<td>Select [History] in the Main screen.</td>
<td>Select one of the measurement modes.</td>
<td>The measurement results is displayed.</td>
</tr>
</tbody>
</table>

- Displays the history of the previous number.
- Displays the history of the next number.
- Selects and display the history of the arbitral number.
- Selects the unit.
- Prints the result.

Screen Transition

- The screens are structured by 6 layers and the operations are mainly performed from the Layer 2 and higher.
- The Main screen for ready to measure is displayed when the instrument is not in the measuring process. The Main screen for measurement is displayed when performing measurements.
- From the Main screen before measurement, you can move to the 4 menu screens: General setting, Measurement setting, Preset, and History.
- Pressing the Home button on the main body will jump from a screen of any layers to the TableΣ on the Main screen.

| The display does not appear when the power is turned ON.     | The AC adapter is not connected properly.  
→ Confirm the AC adapter and power cable.  
Low battery  
→ Replace the batteries.  
→ Recharge the batteries.                                    | 6         |
| The battery drains fast.                                      | The battery is deteriorated.  
→ Replace the battery                                                                                        | 6         |
| Particle count or concentration is too high.                  | The actual concentration is high or the instrument may malfunction.  
→ Attach the provided Zero count filter and confirm that the reading drops to zero.  If the reading remains high, the instrument may malfunction.  
Please contact Kanomax USA.                                    | 7         |
| Particle count or concentration is too low.                   | Laser power failure or flow error  
→ The instrument may malfunction.  
Please contact Kanomax USA.                                    | -         |
| The printer does not operate.                                 | Incorrect baud rate setting  
→ Confirm the printer setting.                                                                 | -         |
| Data can not be stored.                                      | Saving data function is OFF  
→ Confirm the save setting.  
The number of recorded data may exceed 10,000.                   | 12, 10    |
| The measured value of the particles maybe higher in Wi-Fi remote mode. | If Wi-Fi remote connection is used above a metal conductor, the Wi-Fi radio wave may be reflected and affect the measured result.  
→ When using Wi-Fi connection above any metal conductor, please use a non-metallic spacer of 3 cm or more. | -         |
§ 7 Warranty and After Service

The limited warranty set below is given by KANOMAX USA, Inc. (hereafter referred to as "KUI") with respect to this instrument, its attachment parts including standard accessories (hereafter referred to as "PRODUCT") that you have purchased. PRODUCT you have purchased shall be the only one that the limited warranty stated herein applies to.

Your PRODUCT, when delivered to you in new condition in its original container, is warranted against defects in materials or workmanship as follows: for a period of two (2) years from the date of original purchase, defective parts or a defective PRODUCT returned to KUI, as applicable, and proven to be defective upon inspection, will be exchanged for a new or comparable rebuilt parts, or a refurbished PRODUCT as determined by KUI. Warranty for such replacements shall not extend the original warranty period of the defective PRODUCT.

To obtain service under this warranty, you must notify Kanomax USA, Inc. on or before the expiration of the warranty period to obtain directions for returning the defective product. You are responsible for all return shipping charges to the authorized Kanomax service center.

This limited warranty covers all defects encountered in normal use of the PRODUCT, and does not apply to the following cases:
(1) Use of parts or supplies other than the PRODUCT sold by KUI, which cause damage to the PRODUCT or cause abnormally frequent service calls or service problems.
(2) If any PRODUCT has its serial number or date altered or removed.
(3) Loss or damage to the PRODUCT due to abuse, mishandling, improper packaging by the owner, alteration, accident, electrical current fluctuations, failure to follow operating, maintenance or environmental instructions prescribed in the PRODUCT’s instruction manual provided by KUI, or service performed by other than KUI.

NO IMPLIED WARRANTY, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, APPLIES TO THE PRODUCT AFTER THE APPLICABLE PERIOD OF THE EXPRESS LIMITED WARRANTY STATED ABOVE, AND NO OTHER EXPRESS WARRANTY OR GUARANTY, EXCEPT AS MENTIONED ABOVE, GIVEN BY ANY PERSON OR ENTITY WITH RESPECT TO THE PRODUCT SHALL BIND KUI. KUI SHALL NOT BE LIABLE FOR LOSS OF STORAGE CHARGES, LOSS OR CORRUPTION OF DATA, OR ANY OTHER SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES CAUSED BY THE USE OR MISUSE OF, OR INABILITY TO USE, THE PRODUCT, REGARDLESS OF THE LEGAL THEORY ON WHICH THE CLAIM IS BASED, AND EVEN IF KUI HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. IN NO EVENT SHALL RECOVERY OF ANY KIND AGAINST KUI BE GREATER IN AMOUNT THAN THE PURCHASE PRICE OF THE PRODUCT SOLD BY KUI AND CAUSING THE ALLEGED DAMAGE. WITHOUT LIMITING THE FOREGOING, THE OWNER ASSUMES ALL RISK AND LIABILITY FOR LOSS, DAMAGE OF, OR INJURY TO THE OWNER AND THE OWNER'S PROPERTY AND TO OTHERS AND THEIR PROPERTY ARISING OUT OF USE OR MISUSE OF, OR INABILITY TO USE, THE PRODUCT NOT CAUSED DIRECTLY BY THE NEGLIGENCE OF KUI. THIS LIMITED WARRANTY SHALL NOT EXTEND TO ANYONE OTHER THAN THE ORIGINAL PURCHASER OF THE PRODUCT, OR THE PERSON FOR WHOM IT WAS PURCHASED AS A GIFT, AND STATES THE PURCHASER'S EXCLUSIVE REMEDY.
