OVERVIEW

PRE-SHIP

All Kanomax instruments are tested & calibrated immediately prior to shipping so they're ready to use right out of the box.

RECALIBRATION

We recommend calibrating most instruments at least once per year, so any errors or deviance can be identified and addressed quickly.

REPAIR

Kanomax stands by all instruments and offers free repair service if something goes wrong during proper use.

We have one of the industry's quickest turnaround times on both calibration & repair.

KANOMAX CALIBRATION & SERVICE

As many Kanomax instruments are used to measure airflow, particle counts, temperature, pressure, humidity, etc. in environments where a half of a percentage point of error could be absolutely critical, we take calibration service and repair very seriously. That's why we employ the most proven, experienced service technicians and rely on the best calibration equipment money can buy. Although we offer speedy turnaround time on all services, we treat every instrument as if the whole world depends on its performance.

WHY CALIBRATE WITH KANOMAX?

1. PEACE OF MIND

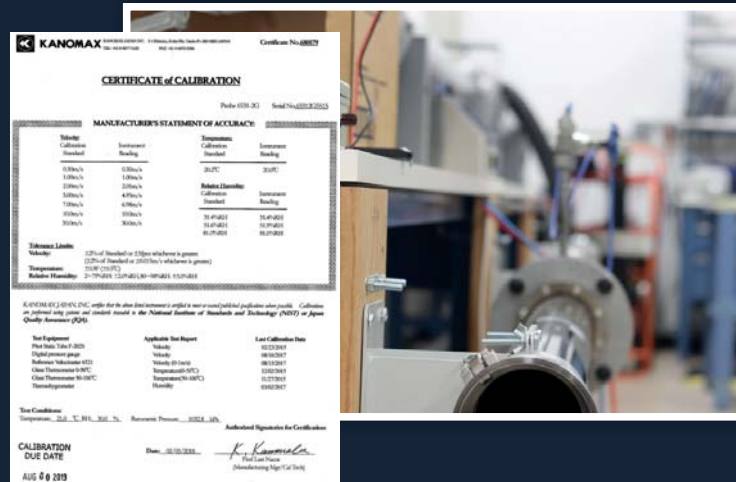

All instruments calibrated at the Kanomax Service Lab are NIST-traceable, and our service manager has over three decades of experience.

2. QUICK TURNAROUND

All instruments are calibrated and returned to their owners from only 3-7 business days

3. ACCURACY

We use the best calibration equipment available. Including a wind-tunnel (both open jet & closed loop), furnace controls (FCO), pressurized LPC unit, temperature calibrators, and more.

WE SERVICE:

- Anemometers
- Particle Counters
- Duct Leakage Testers
- And more
